

RESOPAL CASE STUDY

Construction of new operating rooms in Clinic Gütersloh - Germany

For the expansion of the operating department at Gütersloh Clinic, Motiv in RESOPAL® and 0147 - 60 Affinity in RESOPAL® Compact were used for wall cladding, allowing full customisation for the nine new operation rooms.

 **RESOPAL®**

 RESOPAL®

As part of its expansion, the clinic did not only increase its operation capacity, but also created a warm and understated atmosphere thanks to our Motiv in RESOPAL® compact panels. This initiative helps to make the working environment pleasant thanks to a bright setting, while meeting the health and safety requirements.

Project details

Project type: Operation unit extension

Segment: Healthcare

Location: Gütersloh, Germany

End customer : Clinic Gütersloh

Product used: Motiv in Resopal® Compact
+ 0147 - 60 Affinity in Compact

Applications : Wall cladding

Architect : Stiller | Architekten
Planungsgesellschaft mbH

Fitter: GHK DOMO GmbH

Year of renovation: 2025

At the Clinic Gütersloh, the expansion of the central operating block was not just aimed at increasing its operations capacity. It was also designed to create a more pleasant and supportive working environment for healthcare staff, an objective made possible thanks to the Motiv in RESOPAL® solution. To create a balanced design, the remaining three walls were finished in a subtle, solid-color RESOPAL®.

As part of this extension, six operating rooms have already been completed, with the remaining three scheduled for completion by the end of 2026 year. The design of these spaces was carefully developed to achieve a harmonious overall look, with visual elements inspired by nature. Each operating room features its own personalized design, creating a calm atmosphere in surgical rooms.

At the same time, Compact surfaces meet the sanitary requirements of a hospital environment. They combine hygiene and durability, as they are easy to clean and resistant to impact, disinfectants, and abrasion, while also offering antibacterial properties, which makes them particularly well suited for healthcare settings.

RESOPAL® makes it possible to combine creative freedom with high product quality and technical performance. With the Motiv in RESOPAL® solution, it offers extensive design flexibility while remaining fully adapted to demanding environments such as healthcare facilities.

Product benefits

1

Versatile Designs:

Motiv in RESOPAL® allows complete customisation for a unique result.

2

Easy maintenance :

Non porous, antibacterial surface that is simple to clean and durable.

3

Durable and hygienic:

Resistant to moisture, heat, scratches, stains, repeated disinfection and everyday use, ensuring long-lasting performance.

4

Bespoke Solutions:

Available in custom sizes, formats, and finishes, enabling unique, premium designs for each project

Guaranteed hygiene for healthcare facilities

Thanks to their integrated antibacterial surface, RESOPAL® panels limit the spread of bacteria and guarantee optimal hygiene. Effective, reliable and laboratory-tested, it acts sustainably and does not contain nanoparticles.

It is included as standard at no extra cost. It is effective against seven bacteria, including Staphylococcus aureus, Salmonella and Escherichia coli, which are feared in healthcare facilities.

Non-porous and easy to clean, they are resistant to disinfectants commonly used in hospitals. Ideal for sensitive areas, it is the perfect solution
