

RESOPAL CASE STUDY

Loft Renovation Antwerp - Belgium

For the renovation of this Loft in Antwerp (Belgium), the decor Wenge Nakuru 4110 from RESOPAL® HPL in texture Wooden Heart (WH) was chosen for its elegant and sophisticated look, bringing warmth and refinement to any space. Its rich, dark tones and subtle texture make it perfect for modern and versatile designs.

 **RESOPAL®**

From the kitchen to the master suite, the renovation have transformed completely the surfaces, creating a premium and sophisticated look.

RESOPAL® HPL surfaces make the interior high quality and easy to clean, while keeping a nice atmosphere.

Every detail has been carefully designed to combine elegance and functionality, giving the spaces a modern, welcoming, and refined atmosphere.

Project details

Project type: Loft renovation

Segment: Residential

Location: Antwerp, Belgium

End customer : Private Loft

Product used: Resopal 4110-WH
(SpaStyling + HPL)

Applications : Bathroom and kitchen

Architect : OOG3 Architects

Year of renovation : 2015

The renovation of the kitchen and the master suite have transformed an outdated space into stylish and highly functional areas.

For the custom fittings, RESOPAL® HPL product combined with RESOPAL SpaStyling® using decor 4110-WH, were chosen for their elegant finish and durability.

In addition, its resistance to moisture and heat enhance hygiene and reliability in everyday use, making it particularly well suited for kitchens and bathrooms.

Every design decision was carefully considered to ensure a seamless integration of materials and functions, resulting in a modern and warm atmosphere.

This project demonstrates how RESOPAL® products and decors can meet complementarity to transform everyday room living.

Product benefits

1

Authentic Design:

Wenge Nakuru reflect the natural look and feel of wood - precisely manufactured for consistent quality and refined aesthetics.

2

Versatile Use:

Suitable to kitchens, bathrooms, walls and ceilings.

3

Built for everyday life:

Resistant to moisture, heat, scratches, and daily wear, ensuring long-lasting performance in daily-use areas.

Environmental engagement

RESOPAL® HPL is environmentally friendly in its production, use, and disposal. The product consists of 65 % paper, including 20 % recycled paper, and 35 % water-based resins. Depending on the type, our papers are PEFC- or FSC®-certified (FSC® C104603).

At the end of their useful life, most of our products can be thermally recycled and used to generate energy. Their long life cycles mean that wood resources can regenerate well before the product reaches the end of its service life.
