

RESOPAL CASE STUDY

Truck driver toilet

This public truck driver toilet in Iserlohn makes a statement: the exterior facade combines Motiv in RESOPAL and Motiv in RESOPLAN, while the interior is fully clad in RESOPAL SpaStyling. Robust, easy to clean, and fully customizable, with RESOPAL decor Orange 335, it shows how functional buildings can also inspire.

The surfaces make the building feel modern, high-quality, and welcoming. It's robust, easy to clean, and shows how good design and practicality can work together, even in a public space.

Project details

Project type: New building – Truck driver toilet

Year: 2025

Segment: Public

Location: Iserlohn, Germany

End customer: Hering Sanikonzzept GmbH

Product used: Motiv in RESOPLAN for exterior facade, RESOPAL SpaStyling for interior wall cladding

Applications: Interior and exterior wall cladding

Architect: WALTER EBELING ARCHITEKT BDB

Motiv in RESOPLAN is highlighted here in a public toilet building in the city of Iserlohn. This project here combined Motiv in RESOPLAN and the inside fully done with our RESOPAL SpaStyling solution.

In a high-traffic environment such as a public service area, restrooms must meet strict requirements in terms of hygiene, durability and overall image.

Motiv in RESOPLAN stands out as a solution perfectly suited to these constraints and was manufactured exactly according to the customer's specifications.

For the future we are working hand in hand with our customer Hering Sanikonzzept GmbH for upcoming toilet concepts, bringing further more volume with Motiv in RESOPLAN and RESOPAL Compact with specific and strict requirements.

Product benefits

1

Versatile Designs:

With Motiv in RESOPAL, architects can turn surfaces into statements – adding custom graphics, logos, or imagery directly on durable HPL.

2

Flexible formats:

Whether for walls, facades, furniture, or interior fittings, RESOPAL SpaStyling and RESOPLAN adapt to any size or shape, giving architects freedom to realize their vision.

3

Durable performance:

RESOPLAN is a highly durable HPL panel designed for exterior use. It resists weather, UV, frost, hail, and environmental stress while maintaining colour and appearance. The panels are mechanically strong, impact-resistant, and structurally stable. They are easy to clean and require minimal maintenance.

4

Customisable looks:

RESOPLAN and RESOPAL SpaStyling offer a wide range of designs – wood, stone, colours – for every project.

Environmental engagement

RESOPAL HPL combines performance, design, and sustainability. It's made from 65% paper, including 20 % recycled paper, and 35% water-based resins. Depending on the type, our papers are PEFC- or FSC®-certified (FSC® C104603).

RESOPAL SpaStyling brings the same flexibility to wet and sanitary areas, offering easy-to-clean panels that are hygienic and robust.

For exteriors, RESOPLAN provides weather-resistant, mechanically strong laminates that hold up while looking great - with 10 years warranty.

Together, these solutions give architects freedom, reliability, and sustainability – from interiors to facades – proving that functional surfaces can also inspire.
