

RESOPAL® HPL

ARTICLES UNDER REACH

Dear Sir or Madam,

RESOPAL would like to inform in writing all of our customers about the EU-Regulation No. 1907/2006 for the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH).

REACH is intended to ensure a high level of protection of human health and the environment. The company Resopal is committed to fulfil the demands of REACH fully. We will ensure this in close cooperation with our suppliers.

RESOPAL® High-Pressure-Laminate (HPL) are considered "articles" rather than "substances" under REACH. Since these articles do not intentionally release any substances, REACH substance pre-registration requirements do not apply. The same is also valid for compact laminates for interior and exterior application, composite elements with HPL surfaces and worktops.

Articles are potentially subject to certain aspects of REACH such as customer communication an European Chemicals Agency (ECHA) notification with regard Substances of Very High Concern (SVHC). Resopal will monitor the evolution of the ECHA SVHC candidate list and communicate SVHC content to you should this be ever required.

Your contact for REACH

RESOPAL GmbH
Markus Demmer
Hans-Boeckler-Straße 4
64823 Gross-Umstadt, Germany

Telephone: +49 6078 80-601
E-mail: markus_demmer@resopal.de
